

Untitled document

The April 17, 2012 edition of the *Monadnock Ledger-Transcript* recently highlighted my visit to the Crotched Mountain Rehabilitation Center in Greenfield on April 12, 2012, to view the Center's biomass system. The stop was part of my tour of New Hampshire companies that are using combined heat and power technology to fuel their facilities and provide energy to their customers.

You can read the *Ledger-Transcript* article about my visit here: <http://www.ledgertranscript.com/bass-gets-inside-look-at-biomass-site>
